

GeoIgnite 2022, Canada's National Geospatial Conference is less than one week away! March 1 - March 3.

CANADA'S ONLINE NATIONAL GEOSPATIAL CONFERENCE
MARCH 1ST – 3RD WORKSHOP WEEK 4TH – 10TH

We have extended our workshop week. The free livestream workshop week will now run from March 4th to March 14th.

The GeoIgnite training opportunities and free workshops include:

- International Hydrographer Certification Scheme: Presentation hosted by The Association of Canada Lands Surveyors (ACLS)
- Training: Best Practices for GIS Project Planning and Management
- Workshop: Monitoring Invasive Plant Species Using PlanetScope 8-Band Data presented by Planet
- Training: Introduction to QGIS
- Training: Remote Sensing Applications in QGIS
- Maintaining Quality Places Data: Building a Digital Source of Truth for the Physical World
- Workshop on Maxar's WeatherDesk
- The Integrated Cadastral Information Society: A Collaborative Model for Sharing Geospatial Data: Presentation hosted by the ICI Society
- Workshop presented by SparkGeo
- Training: Introduction to Spatial Data & Using R as a GIS
- Geospatial Job Hunting Seminar
- NV5 Geospatial Topobathymetric Lidar Solutions & Applications Workshop
- ERDAS IMAGINE Training 2022 presented by Hexagon
- Remotely Piloted Aerial Systems (RPAS) for volumetric applications
- GHG Monitoring from Space: A mapping of capabilities across public, private and hybrid satellite missions hosted by WGIC
- Workshop presented by Maxar
- Multi-band SAR Sensors (X, C and L band) and Applications in Canadian Context: Workshop presented by MDA
- Using software to prepare for Climate Change impacts and natural disaster: Deep Dive
- Intermediate QGIS: Functions, Forms, and Processing
